## React Native Developer | Web & Mobile Application Development

+91 7041099374 | [patelyash9712@gmail.com](mailto:patelyash9712@gmail.com) | [LinkedIn](#) | [GitHub](#)

### PROFESSIONAL SUMMARY

---

React Native Developer with 2.5 years of experience shipping 6+ production mobile applications across safety, community, and social-impact domains. Specializes in real-time features live location tracking, push notifications, and chat using Firebase and WebSocket/Socket.io. Also builds companion web platforms with React.js and Next.js, and automates backend workflows using n8n. Focused on writing scalable, maintainable code in fast-moving agile teams.

### TECHNICAL SKILLS

---

**Programming Languages:** JavaScript ,TypeScript

**Frameworks & Libraries:** React Native, React.js, Next.js, Lang-Chain, Redux, Node.js, Express.js

**Web Technologies:** HTML, CSS, Bootstrap, Tailwind CSS

**Databases:** MongoDB, Firebase (Realtime Database / Firestore)

**Cloud & Tools:** Firebase, WebSocket / Socket.io, n8n (Workflow Automation & API Integration), Strapi (Headless CMS)

**Developer Tools:** Git, GitHub

**Core Concepts:** REST API Integration, Push Notifications, CRUD Operations, Authentication & Routing

### EXPERIENCE

---

#### Web/Mobile Application Developer

Jan 2024 – August 2026

#### Shiv Shakti Softech

- Built and shipped 6+ cross-platform mobile and web applications using React Native, React.js, and Next.js across e-commerce, community, and social-impact domains, serving 1,000+ end users.
- Engineered real-time push notification and chat systems using Firebase and WebSocket/Socket.io across 3 production apps, handling live messaging for the Artisan App's user-to-artisan chat and Karzame admin dashboard alerts.
- Built a continuous background location-tracking system using Firebase Realtime Database and Background Geolocation Tracker, delivering live location updates to an admin dashboard at 6-second intervals for real-time journey monitoring.
- Designed 5+ n8n automation workflows integrated with push notification triggers to automate business processes and improve user engagement across production apps.

### PROJECTS

---

#### Karzame – Virtual Safety Application (Live)

Region: Africa (Nigeria) | Platform: Android | [Karzame App](#) | July 2024 – December 2025

- Built a real-time safety tracking application that monitors users during their journey and shares live location with an admin dashboard using Firebase Realtime Database and the Background Geolocation Tracker package.
- Configured automated push notifications for unexpected delays, ensuring timely communication and improved user security.

## **OaVana (Live)**

Duration: 3 Months | [OaVana App](#) | Platform: Android and iOS

- Developed a green initiative mobile app where users complete daily environmental pledges to earn tokens and points.
- Developed daily random pledges, referral rewards, a leaderboard, token management, and user profiles.
- Planned future features including team challenges and a token-based marketplace for redeeming products.

## **Apna Mandal (Live)**

Duration: 6 Months | [Apna Mandal App - Android](#) | [Apna Mandal App - Ios](#) | Platform: Android and iOS

- Built a community management application enabling social organizations (Sanstha) to collaborate on a single digital platform.
- Digitized activities including events, social projects, posts, and donations for community organizations previously operating manually.

**Setu App** | Platform: Android

- Built a devotional/spiritual app that lets users select a chosen deity and access curated content — news, articles, bhajans, aarti, quizzes, and shlokas.
- Added temple information, and event posts, along with a personalized daily highlights feed to keep users engaged with fresh devotional content.

**Artisan App (Rozgar App)** | Platform: Android

- Built a dual-flow local hiring platform: artisans can list their skills and services, while regular users browse local job posts and apply for roles.
- Integrated real-time chat functionality between users and artisans to support local-area job coordination and communication.

## **EDUCATION**

---

**Gujarat Technological University**

2020 – 2024

- Bachelor of Engineering (B.E.) in Computer Science — CGPA: 8.33

## **DECLARATION**

---

I hereby declare that all the information and details above are complete and true to the best of my knowledge.
